## TA100C Color Multimedia Fingerprint Time Attendance System

A fingerprint verification terminal is designed to record time and attendance by using biometrics trait, fingerprint. It is to replace the conventional punch card system as well as other card systems for time & attendance function. The fingerprint terminals are capable of recognizing the recorded fingerprint templates in seconds and therefore, have been successful in eliminating buddy-punching activity, one of the major problems in human resource management.

TA100C Series terminals are able to store fingerprint templates from 1,500 for TA102C to 2,800 for TA103C depending on the series chosen. It is also able to record from 100,000 transactions with TA102C and 120,000 transactions with TA103C, at any given time and those transactions can be downloaded and cleared up using the management software TCMS V2. TA100C Series also offers TA103C-R, fingerprint time & attendance system with RFID card function, TA100TC- touch screen system with card function and TA100TC-R, color multimedia system with card function.
